

GE Healthcare / EMC Centera Best Practice Information Infrastructure

An Infrastructure that serves up scalable, user-friendly archive that boosts clinical productivity

More than 1,700 healthcare organizations have installed the EMC Centera content addressable storage infrastructure from EMC Corporation with good reason. Healthcare organizations are moving from silos of records to consolidated views of all patient information for accelerated service delivery, faster and more accurate billing, and lower operating costs. EMC Centera is a proven archiving platform with online access and assured authenticity, self-management, protection from technology obsolescence, and much more. With so much available in one system from one vendor, healthcare organizations are assured of data integrity, data retention and/or regulatory compliance, the best overall cost of ownership, and business continuity.
